Generating Quality Backlinks...

Backlinks are well known for being the backbone of any SEO Campaign. The problem that most marketers face when attempting to create quality backlinks to their websites are several.

Besides the time it takes to actually create quality backlinks, there is the question of where to start when trying to generate backlinks. The truth is that there are many link building methods.

I will begin by discussing a few of the methods that can be used to generate incoming links and traffic to your website.

Reciprocal Linking:

Reciprocal linking is the process of soliciting other website owners to exchange backlinks. This is a process that can be quite tedious and frustrating to say the least. Once you locate someone you want to exchange links with, you will have to send them an email expressing your desire to exchange links with them.

The problem with reciprocal link building is that there is a high level of rejection if you are just starting your backlink building campaign. Many established marketers will not exchange links with new marketers with low page ranks. Other marketers with similar page ranks may be willing to exchange links with you but that won't do much for your rankings.

The key to building quality backlinks is to receive links from websites that are ranked by Google. Receiving backlinks from a bunch of PR 0 websites will do very little for your rankings.

In addition, reciprocal links do not carry as much weight as one way backlinks.

Creating Backlinks Through Social Bookmarking

Using social networking sites is a much better way to create quality high pr backlinks to your website. Social networking sites like Digg, Propeller, Slash Dot and Yahoo My Web are great for submitting content and receiving high pr backlinks. These social networks are very popular and therefore have very high PR rankings.

There are literally hundreds of social networking sites that you can post your website. The only drawback to posting to the social networks is the time it takes to submit to all the social networks. You also need to be careful not to post too many bookmarking sites too fast, doing so may alarm search engines like Google.

To get the advantage of posting to all these networks without getting your website banned by the search engines, you can use a social bookmarking software.

The [Bookmarking Demon](#) is a social bookmarking software that allows you to post over 160 social networking sites with just a few clicks. The software will save you the hours it takes to post to these sites manually.

The software automatically creates different accounts for you so it doesn't appear that one person is posting to all the networks. This feature will keep your from being banned by the social networks and the search engines.

The bookmarking demon is especially effective if you own several different sites or blogs. You can bookmark every blog post to aid in elevating your blog in the search engines.

Social networks are great, but they are not nearly enough backlink if you are trying to overtake a competitor with thousands of backlinks. This problem leads us to our next method for generating quality backlinkns.

Generating Backlinks Through Website Directories

Website directories are the equivalent of getting your brick and mortar business listed in the yellow pages. There are too many directories that you

can list your website to. Listing your website is as easy as creating an account with each directory, and creating a title and description. It is wise to create several different titles and descriptions to take advantage of different keyword keywords variations to your website.

Posting to hundreds of website directories can take hours to complete. To simplify the process you can use a directory submitter. Brad Callen has a great [Directory Submitter](#) software that can post to up to 1800 relevant directories.

Generating Backlinks Through Article Marketing

Article marketing is powerful way to build unlimited quality backlinks to your website because there are literally thousands of article directories. Many article directories have high page ranks thus creating the perfect scenario for building one way backlinks.

Marketing using articles is a three prong marketing tool. You not only receive backlinks from your efforts, you also receive traffic from your articles as well as extra exposure when other marketers publish your articles.

There are a few issues with article marketing but fortunately for you I will provide the solutions.

One issue with submitting articles to multiple directories is once again, the time it takes to submit one article to thousands of directories. Fortunately there are services and softwares out that can solve that problem.

[Article Submitter](#) is a software that can submit your articles to over 650 directories with a few clicks of the mouse. The software allows you to create 650 backlinks with one article.

[Isnare](#) is another option you can use to submit articles to multiple directories. This directory will circulate you articles to over 500 article directories and blogs.

The methods that I introduced above are great for creating a lot of backlinks but they are still incomplete. When you submit to these directories you create many backlinks with the same article. This doesn't hurt you as far as the relevance of the link, but Google often gives lesser value to duplicate content, which takes us to the final solution.

Tackling The Issue Of Duplicate Content

Duplicate content is an issue that has frustrated many marketers for years. Article marketing is a great marketing tool and even though the backlinks are relevant, the duplicate content issue has lessened their strength. This made it difficult if you were trying to compete with a website with thousands of backlinks.

Duplicate content backlinks would often create a scenario where you would have more backlinks than your competitors and still find your website behind in the rankings. I am happy to tell you that this is no longer an issue. The next three methods I am going to share with you will eliminate all duplicate content issues and create thousands of backlinks virally monthly.

Free Traffic System

Free Traffic System is a system that allows you to submit your articles to a 30 niche blogs for free. The system is unique because It provides an article spinner that can generate 30 unique versions of your article. You are allowed to include 2 links in the body of each article, thus creating 60 free backlinks.

[Free Traffic system](#) also give you the opportunity to create backlinks without writing any articles. This works well if you are not a person that gets excited about writing articles. You can create backlinks by referring others to the system. For every 3 articles your referrals submit, you receive 30 backlinks.

Free Traffic System recently implemented a 2 tier system that rewards you with 30 backlinks for every 7 articles on the second tier. The 2 Tier system gives you the advantage of earning backlinks on people that your referrals refer. This system alone can be responsible for generating thousands of backlinks monthly without much work at all.

Article Marketing Automation

Article Marketing Automation is another system that allows you to post articles to niche blogs. The differences between the two system is that there is a fee for using Article Marketing Automation which is well worth because there are also no limits to how many blogs your articles are circulated through.

[Article Marketing Automation](#) has thousands of blogs with a large variety of categories. Any article you submit will automatically be circulated to all the blogs in the relevant categories. This system also has a built in article spinning software to create unique versions of every article you submit.

Unique Article Wizard:

[Unique Article Wizard](#) offers an upgraded version of both the Free Traffic System and Article Marketing Automation. This system submits your article to thousands of blogs as well as article directories. They also have a article spinning software that creates unique versions of your articles.

The system has over 11,000 article directories and blogs which you can submit to depending on your category. On an average you will be generating 2,000 backlinks for every article submitted. Submit 10 articles per month and you can easily generate 20,000 quality backlinks each month from using UAW alone.

[Free Traffic System](#), [Article Marketing Automation](#), and [Unique Article Wizard](#) all deliver your articles in moderation so the search engines do not get alarm.

The use of all the systems listed in the ebook will relieve you of the stress of building backlinks to your website. You will also be able to dominate any competitor in the search engines for just about any keywords.

Keyword Research

The most important part of building backlinks to your website is being able to locate the best keywords to use as anchored text. Anchored text are the words that you use to link back to your website. When you use your keywords as anchored text, it lets the search engines know that your website is relevant for that keyword. This practice is what is responsible for ranking well for your keywords.

[Word Tracker](#) is one of the best keyword tools on the market. The data provided by the Word Tracker keyword analyzer tool gives you the statistics you need to select the best performing keywords.

In addition to keyword daily search results, the Word Tracker tool offers advanced statistics such as a KEI (Keyword Effectiveness Index). KEI measures the effectiveness of every keyword based on daily search volume, and competitors to name a few.

Final Thoughts

The fact that you are reading this ebook means that you are way ahead of most marketers. It took me years of struggling online before I was able to find the secrets to creating an income on the net.

Many people will download this ebook and never even take the time to read it. Successful people take action while others stand around and watch. The ability to create quality backlinks to your website is the difference from your website appearing on page 1 of Google or Page 10.

Just remember if you are to succeed online, you must do what the top 3% of marketers are doing, because 97% of marketers are not reading this information.

If you need any additional information on building backlinks or if you want to outsource your backlink building campaign you can visit Front Page VIP or educate yourself on link building strategies and other SEO techniques from my natural SEO blog Conversion Junction.
